Delrin® Grade Selector for Gears

	Standard Best balance of performance and cost efficiency	**Low VOC Emissions** Meets latest auto emission regulations Less tool cleaning for high-volume gears	**Enhanced Crystallinity** Faster cycle times Highest stiffness and lower creep	**PTFE Filled** Lowest coefficient of friction and low wear	**Lubricated** Cost-competitive low-friction performance Low squeak	**Toughened** For greater impact strength	**Kevlar® Filled** For best wear resistance	**Glass Reinforced** For higher strength and stiffness	**Renewable Attributed** Bio-based material with up to 75% lower carbon footprint
High viscosity with superior toughness and durability	100/100P	100CPE	51HSE 111DP	100AF	100AL/100ALE	100ST/100T 100STE/100TE	100KM		RA100CPE
High/medium viscosity with high toughness and improved flow		300CPE	311DP			300TE			RA300CPE
Medium viscosity with balance of flow and toughness	500P	500CPE 511CPE	511DP	500AF 520MP	500AL 500CL	500T		510GR 525GR	RA500CPE RA511CPE
Low viscosity for fine/ miniature gears	900P		911DP
