DELRIN® CASE STUDY

Delrin® – for Sanitary Applications

Delrin® in sanitary applications

Trusted by leading brands, Delrin® delivers long-term stability when reliability matters most.

A major water technology company chose Delrin® for valve components in their high-pressure flush system

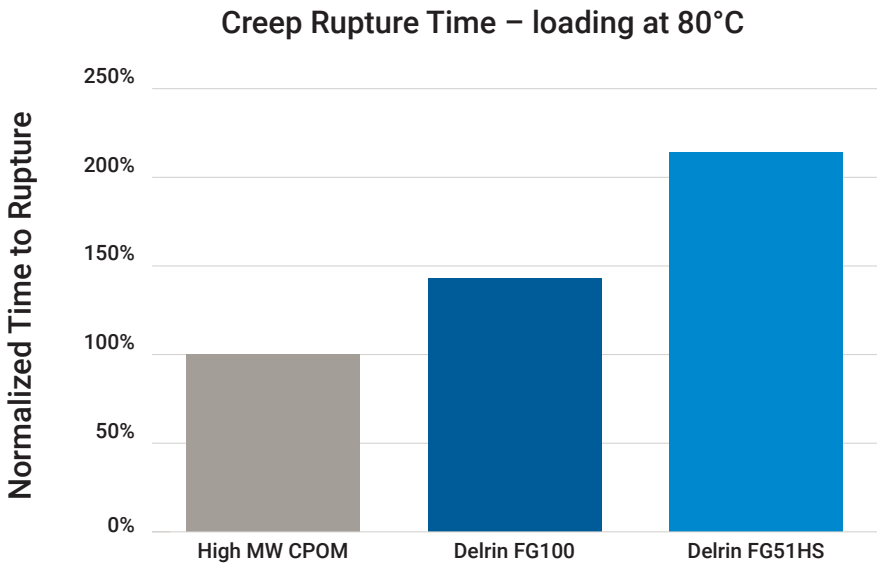

Performance advantages of Delrin®:

- Consistent properties and dimensions in water-rich environments.
- Enhanced creep rupture resistance versus POM-C to pass stringent validation tests and guarantee long-term service life.
- Adherence to a full range of water contact approvals.
- Global product availability and local technical support.

In durability testing, Delrin® FG51HS outperforms the established Delrin® 100 series and endures >2x times more load cycles than high molecular weight POM copolymer formulations.

Delrin – Engineering the Future, Together

Delrin® is an industry-leading premium industrial polymer business. Grounded in strong innovation, Delrin is a category creator with a longstanding reputation for quality, reliability, supply and product performance. The iconic Delrin brand, coupled with proprietary technology and deep application expertise, make us a leader in the high-end engineering polymer market. Delrin has exciting growth prospects from exposure to automation, actuation, healthcare, mobility and consumer applications.
